Emergency Contact Number: 03 8888 1234

Further Notes :-

1. 2 - 2:30PM Please call to get a time to pick up your pet up. Please be ready to come down and collect your pet. In nearly all cases the pet will go home on the same day. We are very fussy and unless we are absolutely sure your pet is ready to go home we will keep them in for overnight cage rest and all due care. Please understand we keep your pet's best interests in mind. Anaesthesia and surgery are always significant procedures. In routine situations extra care is unnecessary, but in some individuals further routine after care is required and is often unpredictable. We seek your cooperation in this area.

2. Please remember payment can only be made by cash, credit card or EFTPOS. It is important to also remember that we don't give any credit or take any cheques to keep our prices to an absolute minimum.

3. Desexing Admissions Only: Please note for desexing operations there are extra fees for patients unexpectedly on heat or pregnant. We will try to contact you on the emergency contact number you have given us today. But if you aren't available we will proceed with the necessary extra care and the regular extra charges for being on heat or pregnant will apply. If your female dog has been on heat recently it may still have an enlarged uterus for some time afterwards and we recommend you wait for at least two months for the uterus to return to a routine size and therefore a routine desexing price. Every pet desexed has a desexing tattoo put into the left ear.

4. All clients must be made aware that there are risks involved with any procedure, sedative or anaesthetic. Please make sure you discuss these risks if you don't understand them in any way.

I have read and understand these details and I have been made aware and fully understand the potential risks associated with the care requested.
